Assignment Assessment Rubric (with Programming Component)

	Excellent (80-100%)	Good (65-79%)	Moderate (40-64%)	Poor (0-39%)	Comments (Score)
Part 1: Report (40%)					
Overall Content (e.g. Title, Introduction, Implementation Info, Conclusion, Appendix)	Contents are clearly inter-related and build upon each other to show how the problem is addressed.	Contents covering most of the sections, but still suffer from cohesively and inter-related.	Contents written had some relation to each other and to the chosen topic. However, majority of the sections are not complete.	Contents written are scattered and unrelated. Student unable to produce relevant contents for the selected problem.	(/)
Scope Selection	Scope of the paper is clearly defined. Assignment focus has been narrowed by specific criteria. The state-of-the-art may be clearly given within the paper's length.	Scope is specific enough that the student can give proper treatment within the given length.	Student has selected a narrowed the scope somewhat. However, the purpose is not clear.	Scope is very general and has no focus. Scope of the paper is so broad or unclear for reader to understand its purpose.	(/)
Implementation Design and Discussion	The design is comprehensive and covers all aspects of the scope. Comprehensive analysis and discussions are performed for the design.	The design is comprehensive, covers reasonable scope. The outcome is analyzed and discussed.	The design is average, covering limited scope. The outcome is analyzed and discussed.	The design is inadequate and does not meet the scope. The outcome is poorly analyzed and discussed.	(/)
Part 2: Program Construction (40%)					
Specification	The program works and meets all the specifications.	The program works and produces the correct results and displays them correctly. It also meets most of the other specifications	The program produces correct results but does not display them correctly.	The program is producing incorrect results.	(/)
Readability	The code is exceptionally well organized and very easy to follow.	The code is fairly easy to read.	The code is readable only by someone who knows what it is supposed to be doing.	The code is poorly organized and very difficult to read.	(/)
Documentation	The documentation clearly explains what	The documentation	The documentation is simply comments	No documentation or comments in the	

	the code is accomplishing and how.	consists of embedded comment and some simple header documentation that is somewhat useful in understanding the code.	embedded in the code with some simple header comments separating routines.	code that help the reader understand the code.	(/)
Part 3: System Demo (20%)					
Organization	Student presents information in a logical, interesting sequence which audience can follow.	Student presents information in logical sequence which audience can follow.	Audience has difficulty following presentation because student jumps from idea to idea.	Audience cannot understand presentation because there is no sequence of information	(/)
Interface	Student uses Interface that enhance audience understanding and interest of the topic.	Student uses Interface that enhance audience understanding of the topic.	Student uses Interface that do not enhance audience understanding of the topic.	Student does not use any graphics.	(/)
Mechanics	Program execution has no mistakes.	Program execution has 1-2 mistakes.	Program execution has 4-5.	Program execution has more than 5 mistakes.	(/)
Subject Knowledge	Student demonstrates full knowledge by answering all class questions with explanations and elaboration.	Student demonstrates some knowledge by answering most questions with explanation and elaboration.	Student demonstrates little knowledge by answering few questions with explanation and elaboration.	Student demonstrates no knowledge by answering questions without explanation and elaboration.	(/)
Verbal Skills	Student speaks with great fluctuation in volume and inflection to maintain audience interest and emphasize key points.	Student speaks with some fluctuation in volume and inflection to maintain audience interest and emphasize key points.	Student speaks with little fluctuation in volume and inflection to maintain audience interest and emphasize key points.	Student speaks with no fluctuation in volume and inflection to maintain audience interest and emphasize key points.	(/)
